Abdulrasheed Ibrahim (Abdul)

https://www.abdull.dev

Senior Software Engineer with 10+ years of experience building scalable systems and writing high-quality code in Python, Javascript, Typescript, and C. Strong background in system design, performance optimization, and modern software practices like TDD and Agile. I am an active Contributor to the Python Programming Language (Cpython).

EXPERIENCE

Head of Engineering

Convexity Technologies Limited

Contract: Aug. 2025 – Present

Leading engineering deparment / contributing to the development of various projects including CHATS, cNGN, StableRail, and Scrybit.

Skills: Python, Rust, Axum (Rust), Soroban (Rust), Firebase, C, AWS, Django, Django-Ninja, PostgreSQL, Kafka, Redis.

Senior Software Engineer

FoundryAI - San Francisco Bay Area, US

Contract: Apr. 2025 – Aug 2025.

Worked on the foundry's gent web engine (AWE) for rendering static sites, particularly LinkedIn and Salesforce (using Scratch Orgs) using a redis-based pooling system.

Also, worked on the Foundry's Pypi package for developers to integrate with.

Skills: Python, Flask, PostgreSQL, AWS, GCP, Proxies, WebScraping, Redis.

Chief Technology Officer

MyHives B.V. - The Hague, Netherlands.

Part Time: Feb. 2023 – Apr 2025.

Designed and led the development of MyHives' core services, including the backend architecture, supporting microservices, and full cloud infrastructure using AWS CDK, Terraform, ECS, and comprehensive network setup (VPCs, load balancing, route tables, and more).

Skills: Python, Django, Django Ninja, AWS, CDK, Microservices, ReactJS, React Native, Rust (Axum)

Senior Software Engineer

Isofy - South Carolina, United States.

Nov. 2023 – Jan, 2025

Contributed to the implementation and management of the NAC system and Isofy Portal, working on key features including remote NAC reboot, roaming user support, OfficeRND integration, and various other enhancements to improve functionality and user experience.

Skills:
Django, Python, GraphQL, Juniper, Cisco Meraki, React, AWS.

Skills

- **Python** Senior
- **C** Senior
- **JavaScript** Senior
- **Rust Language** Experienced
- **TypeScript** Senior
- **Django** Senior
- **React Native** Senior
- **Flask** Intermediate
- **React** Senior
- **FastAPI** Experienced
- **LLMs Finetuning** Intermediate
- **AWS** Intermediate
- **PostgresQL** Senior
- **Linux** Expert
- **MySQL** Senior
- **NodeJS** Intermediate
- **AWS ECS/EKS** Comfortable
- **Kafka** Intermediate
- **NextJS** Intermediate
- **Web3.py** Intermediate
- **RabbitMQ** Intermediate
- **Web3JS** Intermediate
- **Ollama** Experienced
- **Redis** Intermediate
- **Lmma cpp** Experienced
- **SQS** Intermediate

Head of Engineering

Zarttech B.V., The Hague, Netherlands

Jan. 2023 – Nov, 2023

- Provide strategic leadership to the engineering team, overseeing all aspects of software development, architecture, and technology decisions.
- Actively participate in the development of critical microservices, leveraging hands-on experience to guide the team and ensure high-quality code.
- Define and implement robust software architectures for diverse projects, ensuring scalability, performance, and alignment with business objectives.
- Lead technology stack decisions, evaluating and adopting frameworks that optimize development efficiency and project outcomes.
- Conduct comprehensive code reviews, fostering a culture of code quality and adherence to coding standards.
- Collaborate with cross-functional teams to address complex technical challenges and ensure successful project delivery.
- Interface with clients and senior management, offering insights and guidance on optimal technology solutions for business needs.
- Mentor and develop a high-performing engineering team, nurturing a culture of continuous learning, innovation, and collaboration.

Key Achivemennts

- Successfully led the development of critical microservices, contributing hands-on expertise to ensure the delivery of high-quality, scalable solutions.
- Designed and implemented robust software architectures for JobPro, resulting in enhanced scalability and performance.
- Strategically influenced and implemented technology stack decisions, improving development efficiency and project outcomes for [number] initiatives.
- Conducted thorough code reviews, maintaining a high approval rate for pull requests and ensuring code quality and consistency.

Rust, Python, PostgreSQL, AWS, Axum, Django, NodeJS, Redis, Celery, Supervisord

Technical Lead

Zarttech B.V., The Hague, Netherlands

June 2022 – Jan. 2023

- Did code reviews, and accept/reject pull requests.
- Build communication systems using WebRTC and WebSocket to facilitate real-time video conferencing, server-side call recording, audio, and file sharing.
- Interviewed hundreds of candidates for placement in different roles.
- Trained and mentored apprentices and specialists.
- Provide guidance and help developers solve complex problems.
- Design high-level software architectures and build teams around several projects.
- Advise clients and management on the choice of Technology Stack for new projects.
- Provide clients and management with updates regarding project progress.
- Identify skill gaps in developers and recommend ways of improvement and organize training when necessary.
- Train Technical Recruiters about various Tech Stacks in different domains.

- Manage the Organisation's code repositories and cloud services (Azure, Github, AWS, etc).
- Writing original code challenges on Coderbyte, TestGorilla, and CodingGame to help recruiters screen candidates for Technical Interviews.

Key Achivemennts:

- I Implemented processes that improve team efficiency and productiveness.
- I Trained 2 Junior developers over time, making them transition into mid-level devs.
- I interviewed hundreds of candidates to assess their technical expertise in various programming languages and frameworks; 83% of those I approve were placed.
- Discovered key issues that lead to a security breach on a client's project.
- Received a Leadership Award for the Zarttan embracing leadership and the challenges that come with it.

Rust, Python, PostgreSQL, AWS, Axum, Django, NodeJS, Redis, Celery, Supervisord

SOFTWARE

Kibana, Insomnia, Postman, DataGrid

LANGUAGES

English – **Fluent**

AWARDS

Leadership Award

Zarttech - Aug 2022.

Award of Recognition for the Zarttan embracing leadership and the challenges that come with it.

Most Valuable Person (MVP)

Zarttech - Jul 2022.

This is an award of recognition for the most valuable person breaking new milestones.

Lead Mobile Application Developer

Zarttech B.V., The Hague, Netherlands

Sept. 2021 - June, 2022

- Built cross-platform mobile applications for iOS and Android.
- Maintain existing react-native projects.
- Upgraded all packages and react-native version from 0.52 to 0.68.
- Refactored a react-native project from working with Class-Based fashion to Function-based.
- Report updates to the team lead and product owner.
- Built a KYC app that works with face detection and performs face identification for internal project.
- Configured CI/CD pipelines to automate building and publishing apps.
- Used React Native CLI, Expo, AppStore Connect, AWS, Firebase, PlayStore Console, Azure AppCenter, Azure, DevOps, Web3js, React, Redux, ImmerJS, NodeJS, Deno, Immutablejs.

Key achievements:

- Delivered quality applications that made our client happy to renew his contract.
- Designed and Implemented the KYC mobile app.
- Received the Rising Star Award for "the best newcomer within Zarttech with the most impact".
- Received an MVP award for "the most valuable person breaking new milestones".

Senior Software Engineer

March. 2021 - Sept. 2021

AlphatechHub Integrated Services, Abuja Nigeria.

- Built the application's backend that supports the company's cryptocurrency mining rigs.
- Create, Sign, and Broadcast Bitcoin and Ether transactions on the blockchains using Python and Django.
- Contributed to several other projects.
- Worked with Django, Channels, React, React Native, Redux, OneSignal, Blockchain, Web3, Block.io.

FullStack Developer - Python / React Native

Carilo. Lagos, Nigeria.

March. 2020 - Feb. 2021

- Used Django and Django Channels to create a module responsible for broadcasting when there is a new bid on a package.
- Single-handedly created the mobile application for both iOS and Android using React Native and Expo.
- Implemented the design of the product's landing page using React.
- Worked with Django, Channels, React, React Native, Redux, and the Context API.

Senior Software Engineer

Bitpoint Limited - Yola, Nigeria.

Feb. 2017 - March. 2020

- Worked on building a multi-tenant SaaS Solution used by different schools in Nigeria.
- Scaled the product on AWS using ELBs, EC2s, and Lambdas.
- Trained several Junior Developers, IT Students, and Interns.
- Worked with Django, Channels, React, Redux, WebRTC, WebSocket, Redis, RabbitMQ, SNS, SQS, Flask, FastAPI, Nginx, Apache, Gunicorn, etc.

Senior Backend Developer

Eselynzz Integrated Services - Abuja, Nigeria

June, 2015 - Jan. 2017

- Worked on the Lynzz finance backend using.
- Managed deployments of multiple release channels.
- Configured networking and load balancers for scaling.
- Help mentor a junior dev.

EDUCATION

B.Tech: Degree in Information Technology

Modibbo Adama University of Technology, Yola.

Diploma in Information Technology

Modibbo Adama University of Technology, Yola.

CERTIFICATE

Unconscious Bias
